

# Managing your retirement account online

Security is important. You lock the door when you leave home, right? So why not lock up your retirement savings?

## Protect your account

Keeping your account secure is a top priority for Lincoln, but it's a responsibility we share with you.

What can you do to help keep your savings safe? Visit [LincolnFinancial.com/Register](https://LincolnFinancial.com/Register) to register your retirement plan account online. This prevents unauthorized individuals from signing up in your place and gaining access to your savings.

### Follow these security tips when setting up your online account:

Choose a unique username, not your email address.

Make your password strong by including lowercase and uppercase letters, numbers, and special characters.

Then log in at [LincolnFinancial.com/Login](https://LincolnFinancial.com/Login) to manage your account and monitor your progress. [Learn more about the features.](#)

## What else can you do?

It's not just your retirement plan account you want to secure — it's all your online interactions. To help you stay safe, we're providing this [interactive cybersecurity brochure](#) with videos and information on scam scenarios, how to identify threats, and ways to protect yourself online.

## Working together to protect your data

Lincoln is committed to preventing cybercrime, but we need you to take some important steps to secure your data. To learn more, visit [LincolnFinancial.com/Cybersecurity](https://LincolnFinancial.com/Cybersecurity). If you need help registering your account, contact our Web Support team at **800-648-6424**.

Visit [LincolnFinancial.com/Register](https://LincolnFinancial.com/Register) today!
